

BIONIC TOUCH 2

Sage MAS 90 Sage MAS 200

Client/Server
Client/Server for SQL Server

Bionic Touch 2

- Time Recording Clock-In / Clock-Out
- Ability for Customized Integration with Additional Sage MAS 90 • MAS 200 Modules

Give Your Computer the Finger

The Bionic Touch 2 enhancement integrates with Champ Systems Time Recording module to allow employees to clock in and out using the Microsoft Fingerprint Reader (pictured above). Now employees do not need to carry around time cards or badges or worry about losing them. Since each fingerprint is unique, the system prohibits employees from clocking in for one another. Time Recording tracks the hours for each employee and this data is then used in Payroll.

Champ Systems can develop additional Sage MAS 90 • MAS 200 enhancements for the Microsoft Fingerprint Reader based on your specific security needs.

See reverse for more features and screen shots. Discounted price for existing Bionic Touch users.

Features:

Easily Enroll Employees	The Bionic Touch 2 interface makes it simple for administrators to enroll new users and set up fingerprint templates.
Set Quality of Prints	Fingerprint quality can be set high or low, depending on how precise of a fingerprint match you want.
Integrates with Champ Systems Time Recording Module	Bionic Touch integrates with Champ Systems Time Recording module, which keeps track of each employee's hours worked. This allows employees to clock in and out using only their finger (no more lost employee badges).
Customized Versions Available	Champ Systems offers customized programming for biometric integration with Sage MAS 90 • MAS 200.
Fast Performance	High-speed matching algorithm allows for fast performance (3,500 prints/second on a Pentium IV 2.8 GHz)
New Feature	Bionic Touch 2 now features 1 : N fingerprint identification. Employees will be identified by their fingerprint and will be logged in or out automatically. Manually providing the employee number is no longer required.
